SYNOPSIS OF COAL MINING REGULATIONS

Coal mining rights of the Dominion in Manitoba, Saskatchewan, Alberta, the Yukon Territory, the Northwest Territories and British Columbia, may be leased for a term of twenty-one years at an annual rental of \$1 an acre. Not more than 2,000 acres will be leased to one applicant.

Application for a lease must be made to the Agent or Sub-Agent of the district in which the rights applied for are situated.

In several territories the land must be described by sections, or legal subdivisions of sections, and in unreserved territory the tract applied for shall be staked out.

Each application must be accompanied by a fee of \$5, which will be refunded if the rights applied for are not available but not otherwise.

A royalty shall be paid on the merchantable output of the mine at the rate of five cents per ton.

Every lease of coal mining rights which are not operated shall terminate the district agent to shut off the coal mine. A seven day notice will include the coal mine. A seven day notice only, but the lease may be permitted to purchase water rights available surface rights may be considered necessary for the working of the mine at the rate of \$1 an acre.

For full information application should be made to the Secretary of the Department of the Interior, Ottawa, or to any Agent or Sub-Agent of Dominion lands.

W. W. Coy,
Deputy Minister of the Interior.

BLAIRMORE TO HAVE A MINE

WEST CANADIAN COLLIERIES DECIDED TO OPEN PROPERTY THERE

DRIVING TUNNEL NOW

Company Reaches Definite Decision to Take a Mine and Already Has Plans Prepared and Work Started—Hopes Long Deferred, to be Initiated.
Blairmore is to have a mine—and a pay roll.

The West Canadian Collieries has decided to open its coal property at that place and before another year has passed it is expected a well developed mine with a good output will be in operation.

It has been known for some time that a tunnel was being driven on the property on the south side of town but it was supposed to be nothing more than prospecting work and little thought has been given to the matter. Now, however, it is learned and The Frank Paper is able to state authentically that the company has decided to open the property and make a mine and that the work being done is preliminary to that end.

A survey has been made and plans for opening the mine prepared and the tunnel being driven is designed for permanent use. Owing to the unusual depth of the wash the coal has not been struck yet but it is expected the seam will be reached in a short time. As soon as the coal is tapped the work of driving a permanent entry will be pushed with all expedition with a view to getting the mine on a shipping basis at the earliest possible date. Prospecting work

done some time ago, has shown the seam to be about ten feet in thickness and the coal of an fine quality as is mined in the district.

The portal of the tunnel opens on Lyon creek, perhaps 500 yards from the office of the company in Blairmore. It is being driven at a tippie height and overlooks a magnificent operating site. The plans contemplate a spur track to diverge from the C. P. R. track a little to the west of the company's office and running southeasterly along the flat to the mine, affording a level yard of any capacity that may ever be required.

It is the hope of the company that the mine may be put on a shipping basis within the year.

The decision of the company is of the utmost importance to Blairmore as the town is the center of the village, the oldest in The Pass, have suffered the want of a pay roll and the town for that reason and because of the townsite controversy, has been held back while younger places have gone to the front. With the townsite matter settled and the needed pay roll assured, Blairmore will without doubt go ahead.

The mill property in question is that which was acquired from the government by Fishburn and Proctor and was the first to be acquired in The Pass. The original holders many times announced the intention of operating but hopes thus aroused among the Blairmore people, always were doomed to disappointment. Finally the West Canadian company bought the property and established its main offices at Blairmore. Hopes were again raised that a mine would be opened but a change in the policy of the company again deferred a realization of the dreams of the Blairmore people and the property under the present ownership has lain idle for five years.

This time their hopes do not appear to be any doubt that the people who have been starved with the place will realize on their faith in the town as The Frank Paper's information is, that it has become one of the earliest policies of the company to make a mine and that determination having been reached, it remains but for sufficient time to elapse to enable the plans to be put into effect, for the intention to become a reality.

Blairmore with the most beautiful site in Alberta, the pay roll of a good mine assured and the promise of an other from the company, ought to make a cracking town.

BLAIRMORE MURDERER HANGED

Mar Hong, the Chinese laundressman who murdered his brother Mar Ling at Blairmore July 31st last, was hanged at Macleod Tuesday morning.

Sharp at 8 o'clock in the morning, with the thermometer standing at 25 degrees below zero, Mar Hong, the condemned murderer, was taken from his cell in the scaffold.

He walked erect without assistance, being followed by Radcliffe and police officers. He ascended the scaffold and stood apparently calmly indifferent as the cap was placed upon his head and the noose adjusted.

He stared at the noose hard for a moment before the cap was placed over his features. The Lord's prayer was repeated by the sheriff when the bolt was drawn and the man shot downward, having a drop of about ten feet, and before a light into there was scarcely a movement made. Ten minutes after the trap fell a doctor pronounced life extinct.

Several Chinamen, supposed to be cousins of the murderer were present at the hanging.

While the guards were being changed last week the Chinaman made an attempt to take his life. The guard coming on duty found Mar Hong under the bed clothes, black in the face with his eyes tightened around his neck. The cue was out and a guard was kept over him continually until he was executed.

The murder for which Hong was hanged was committed over a matter of \$150 which Hong had placed in the hands of his brother for safe keeping but which the brother is said to have lost gambling and when he failed to make it good Hong took revenge.

He was hanged at the bridge to death.

PROPOSED FOR CIVIC HONORS

NOMINATIONS FOR COUNCILORS FOR PASS TOWN MADE MONDAY

TWO BY ACCLAMATION

No Contest at Coleman or Frank—Hills more in Cole—A List of Candidates in Field—Important Work for Councils to be Done.

Nominating meetings for placing in the field candidates for member of the village council for the various precinct villages of The Pass for 1909 were held Monday evening.

There was but a small attendance of ratepayers in any instance owing to the severity of the storm that prevailed but sufficient turned out to place tickets in the field.

In Coleman and Frank, acclamation settled the matter and obviates the necessity of elections, but at Blairmore there will be a fairly scintillating judgment from the number of candidates in the running. Six candidates were named and it is understood all will make the race.

In Frank, six candidates were named but three will decline to run thus leaving the result virtually an acclamation. The candidates named were Dr. G. H. Macdonald, Jake Whiller, Harvey Murphy, W. J. McGowan, S. J. Watson and Alex Goyette. Mr. Goyette promptly handed in his declination. It is stated that Messrs. McGowan and Murphy will also withdraw for the reason that while both are tax payers, it is through the companies in which they are interested and as there seems to be a question of law as to their eligibility.

At Blairmore the candidates nominated were Dr. Morino, H. Escoe, T. Frayer, H. E. Lyon, L. Duff and James Boyle. The election will be held next Monday.

In all three towns the year is expected to be an important one in municipal matters. At Frank and Coleman there is much that requires to be done in the way of general public improvements while at Blairmore the question of a water supply is the big item.

In each case the work contemplated is of such a nature that the members of the councils will be required to give much attention to village affairs.

THE ITALIAN EARTHQUAKE

While only approximate estimates of the number of victims of the earthquake in Italy can be made, it is certain that the fatalities are heavy enough to give it immediate rank as one of the greatest calamities in recorded history. Of course, the property loss will not equal that of the San Francisco earthquake of April 18, 1906. As respects human life, the most destructive earthquake of which modern history has previously made mention was that of Nov. 1, 1755, in Lisbon, the capital of Portugal. This occurred on a Sunday morning, on the great festival of All Saints' day, and the churches were full to overflowing. Within less than six minutes thirty thousand people were buried in the city's ruins and as many more perished before the end of the catastrophe, the results of which lasted six weeks.

Both in ancient and modern times Sicily has been a home of earthquakes. The same city of Messina was destroyed by one in 1783—the number of deaths being estimated at 40,000. More than once before that time it had been visited in the same awful manner. Messina, according to tradition, is one of the oldest towns in the world. It was founded by the Greeks as long ago as 1064 B.C. Its harbor is one of the best in the Mediterranean, and so much resembles a skele, that the town took its original Greek name from that instrument called Zancle. Before the earthquake of 1783 the streets were narrow and dirty, and Messina bore an ill name as a breeding place of disease and brigandage. But it was rebuilt on a better basis. Among its public edifices were more than fifty churches, many of them of great beauty and adorned with fine sculptures and paintings. The cathedral was a Gothic structure, of a heavy exterior, but supported within by vast pillars of granite, supposed to have belonged to a temple of Neptune. Many other buildings were fine specimens of Italian architecture. Its population was about 175,000.

When San Francisco was stricken, all the world rushed aid to it in the form of money and supplies. Philanthropy, the world over, will be equally quick to respond to the earthquake sufferers in Sicily. Naturally enough, the Red Cross is appealed to to take charge of the work of succoring the distressed; the Red Cross never failed in work of this benign character.

WORK TO ANGLISH COAL DUTY

Referring again to the subject of the possibility of the removal by the United States of the duty on Canadian coal, dealt with on this page last week, the following from a recent press dispatch is of interest: "Spokane, Wash., Dec. 27.—The commercial organizations throughout the inland empire and the northwest will be invited to join the chamber of commerce and the 150,000 club of Spokane in a memorial to the tariff revision committee and the Washington, Idaho, Oregon, Montana and Utah delegations in congress asking for the removal of the tariff on coal. This means that a short ton will be 50 cents cheaper than at present, thus saving thousands of dollars a year to the manufacturing concerns, steam plants, offices and hotel buildings and house holders in districts depending upon the mines in British Columbia for their fuel supply."

From the above it will be seen that the People of Spokane are alive to the benefits that would accrue to their territory by the removal of the coal duty. If we of this locality are equally alive to our best interests, no delay will be permitted in the inauguration of a movement to interest and enlist the assistance of the rest

of the west of Canada in an effort to induce the Canadian government to introduce a reciprocal arrangement which would no doubt insure the removal of the American duty. Other important business prevented the Frank board of trade from meeting Monday evening but it should be seen to that a meeting be held without delay and steps taken to get the movement under way.

THE CANADIAN ROUTE WINS

Canadian Courier: Canadians will rejoice that the Canadian Pacific railway has won its second trade race from Yokohama to Liverpool. There are two ways by which goods may pass between these two ports. In the one case, goods may be sent by Japanese steamships and the United States railways; in the other case, the goods may be sent by Canadian Pacific steamships and the Canadian Pacific railway. A few days ago a valuable consignment of silk was sent from Yokohama to New York by the Japanese steamers and two days later an equally valuable cargo of silk was shipped on one of the Canadian Pacific Railway expresses, also booked for New York. Although two days later in starting, the consignment sent by the Canadian Pacific reached New York twelve hours ahead of the other.

Again, the day will come when the Royal Mail of the Pacific will be the only one.

Does such a tremendous trade

"HOW"

It is done is this: we always carry an enormous stock of the choicest merchandise obtainable thereby enabling us to sell at the lowest possible prices to our customers. Always a change we have smoked fish and fresh crabs, shrimp, etc

When you require a good joint, give us a trial.

Everything in the Jeweler's Line.

WATCHES, CLOCKS, TABLE WARE

JEWELRY OF EVERY DESCRIPTION

ISSUER OF MARRIAGE LICENSES.

Alex Cameron, Coleman, Alberta

HAS A LIKELY SCHEME

Malcolmson McKensie, member of the legislature for Macleod, has what seems to be a very likely scheme for obtaining railway competition and branch line extensions in southern Alberta. In an interview in Calgary a few days ago he outlined his idea for securing railway competition and relieving freight congestion.

He proposes to have the C. & E. railway double tracked from Edmonton to Calgary, and the track thrown open to all railways to travel over. In case that arrangements could not be made by the C.P.R. he would expropriate. He believes that under such arrangements at least two United States transcontinental railways would run over the road and the Chicago, Milwaukee & St. Paul roads would use this public highway to get into Alberta.

This would relieve the country of the freight congestion and do more to encourage the building of branch railways than anything else could do. He favors the double tracking because the route of the C. & E. is the freight centre at present, and will continue to be the freight center for some years to come, and double tracking is not nearly as expensive as building.

Though the government has no announcement yet to make, Mr. McKensie is quite satisfied that it will place before the house a very complete and satisfactory policy of railway extension through all parts of the province, and particularly through southern Alberta.

Frank News in Brief

Cottage to rent. Apply J. B. Farmer. 512 a month.

Mr. and Mrs. W. J. McGowan paid a visit to Michael Saturday.

A picked team of hockey players from Frank and Blairmore played the Coleman regular team at Coleman Friday evening and showed so well that Coleman was only able to win by a score of four to two.

Notwithstanding that New Year's eve was severely cold the citizens hall given at School Hall proved an unqualified success. A large attendance of guests, many coming from the surrounding country, excellent music, a handsomely decorated hall and a delicious supper all contributed to make the evening one of complete enjoyment.

A new low temperature record for The Pass was established during the recent weather disturbance which was perhaps the most severe ever experienced since this district was settled. The storm set in Saturday afternoon and continued with unabated fury all of Sunday and the greater part of Monday. Monday night the mercury went to 42 below Frank and at Blairmore where the felt, it is said 56 was recorded, the lowest ever known in The Pass as far as the memory of the oldest inhabitant runs. The storm occasioned much inconvenience to the C.P.R. as the snow fall was exceedingly heavy. A blockade above Grows last hung up all trains from Sunday night until Monday evening and while nearly all trains have since been running far behind schedule, still they are getting through.

NOTICE

Notice is hereby given that in accordance with the provisions of the Irrigation Act the International Coal & Coke Company, Limited, have filed the memorial and plans required by Sections 13 and 15 of the said Act, with the Commissioner of Irrigation, at Calgary, Alta. The applicant Company applies for the right to divert Twelve (12) cubic feet of water per second from McGillivray Creek to the North-west quarter of Section Seven (7), Township 13 North, Range Four (4), West of the Fifth meridian, for industrial purposes and other necessary works as shown by the memorial and plans filed for the said industrial and other purposes at Coleman, Alberta.

The following lands are also affected by right of way proposed works, viz.—Section Eight (8), Township Eight (8), Range Four (4), West of the Fifth meridian; the North-east quarter of Section Seven (7), Township Eight (8), Range Four (4), West of the Fifth meridian; and the North-east quarter of Section Eight (8), Township Eight (8), Range Four (4), West of the Fifth meridian. Dated at Coleman, Alta. this 15th day of December, 1908.

INTERNATIONAL COAL & COKE CO., LTD., Applicant.

Alex Goyette, dealer in furniture and wall paper.

George Cobley spent New Year's day at Macleod.

Henry Gibeau has been laid up for several days with a severely injured foot, the result of having stepped on a nail.

W. G. Pearson, formerly mine manager for the Canadian-American company but now with S. M. Moore on the Elk river, spent the holidays with his family at Blairmore.

The meeting of the district board of the U. M. W. A. set for last Saturday at Blairmore, which was to consider the Millerist difficulty over pillar prices, was postponed and was held Tuesday and Wednesday. The board declines to accept the proposed reduction of the pillar price at Millerist. In consequence, it is stated, the pillars will be closed down until the new agreement is made.

S. M. Moore, formerly general manager of the Canadian American company but now in charge of the work of opening up the coal property of the C.P.R. on the Elk River in British Columbia, arrived in Frank yesterday on a visit. Mr. Moore states that he expects to keep the road up the Elk open all winter and continue the work in progress. He is having development preparatory to the coming of a railroad which is generally expected will be built up the Elk this year and is driving a number of working entries on different seams which range from ten to twenty feet in thickness. He states that the coal is of an exceptionally fine quality.

NOTICE

Notice is hereby given that in accordance with the provisions of the Irrigation Act the International Coal & Coke Company, Limited, have filed the memorial and plans required by Sections 13 and 15 of the said Act, with the Commissioner of Irrigation, at Calgary, Alta. The applicant Company applies for the right to divert Ten (10) cubic feet of water per second from McGillivray Creek to the North-west quarter of Section Seven (7), Township 13 North, Range Four (4), West of the Fifth meridian, for industrial purposes and other necessary works as shown by the memorial and plans filed for the said industrial and other purposes at Coleman, Alberta.

The following lands are also affected by right of way for the proposed works, viz.—The South-west quarter of Section 34, Township 13 North, Range Four (4), West of the Fifth meridian; the North-east quarter of Section 35, Township 13 North, Range Four (4), West of the Fifth meridian; and the North-east quarter of Section 36, Township 13 North, Range Four (4), West of the Fifth meridian. Dated at Coleman, Alta. this 15th day of December, 1908.

INTERNATIONAL COAL & COKE CO., LTD., Applicant.

School did not reopen Monday as intended owing to the severity of the weather. Miss Berry teacher in the second room, was returning from spending the holidays at Sand Point Idaho, and was storm bound at Fort. Prof. Huston was on hand but the pupils could not get to school and no attempt was made to open. Owing to the continuance of the cold spell and the difficulty in heating the school building, it was decided to remain closed for the week.

MCDONALD TURNED DOWN

The annual election of officers of the district board of the U. M. W. A. which was held recently, resulted in the turning down of J. A. McDonald secretary treasurer during the past year. It is stated that the result was brought about by the refusal to

count the vote of one Saskatchewan local because the returns from that local were a day late in reaching headquarters. Had that vote been counted Mr. McDonald would have been re-elected by about sixty majority. It is likely that a protest will be entered.

It is said that the turning down of Mr. McDonald is the result of his refusal to become a socialist. That organization has secured the support in the miners organization and

all the officers except Mr. McDonald had joined the socialists. Because of these facts there had been friction for some time and Mr. McDonald's defeat was generally regarded as for-doomed.

The officers elected were: P. H. Sherman and J. H. Galvin, re-elected president and vice president respectively; A. J. O'Brien, secretary treasurer; and J. H. Galvin, J. H. Galvin, Wm. Wainwright, Michael John Johnson, Coleman Jas. Boyle, Taber and Wm. Dunlap, bankhead.

HEALTH Without MEDICINE

HEALTH CAN BE SAVED BY THIS NEW METHOD

Dr. H. Sanche & Co.
All rights reserved.

All sickness is alike to OXYDONOR. It applies to all cases to name what the form of disease may be. The human body is revitalized by oxygen from the air. No one can apply Oxydonor rightly without benefit. No one is now incurable in any form of disease until the prime conditions of life are lost by the irreparable destruction of some vital organ. Oxygenation of the whole organism through the use of Oxydonor restores and removes all difficulties in any diseased condition as long as it is applied early enough. It has brought health and happiness to scores of miserable sufferers from Rheumatism (Sciatic, Inflammatory, Muscular) Nervous troubles Bright's Disease, Catarrh, Jaundice, Indigestion, Dyspepsia, Lung Trouble, Erysipelas, Liver, Kidney, Bladder and Stomach Troubles, Puerperia, Leucorrhoea, Brucellosis, Paralysis, Childless ailments, Female Troubles, Glands, Abscesses, etc.

Mrs. Anson Wilcox, Neapolis, Alta., writes: "I received the Oxydonor and find it a source of great relief, although I have had it hardly a month. The first night I slept undisturbed for weeks and my bowels have moved regularly every morning while I used the Oxydonor during the night."

My general health is greatly improved. For years I have been compelled to take a holiday every day and have been subject to severe headaches and nervousness, but find them all disappearing and how thankful I am. My children say I look ten years younger, and I was just sixty-nine years old the 5th of May."
